Bodybuilding has not changed over the last 50 years that I have been involved in the game. The reason why most people fail to put on any amount of muscle mass is, because they tend to do advanced techniques right from the word go. Bodybuilding is a science and like science, if you miss out, or skip an element then, the experiment will fail. Bodybuilding is without doubt one of the most difficult sports to get yourself involved with, because bodybuilding requires not only physical strength, and determination, but the knowledge to understand how the body works. Not understanding or having the knowledge will seriously hamper your efforts. My book 'Building a Powerful Physique', will help you gain the correct knowledge, and just as importantly, shows you 'How' to execute that knowledge. Built on my 50 years experience in bodybuilding and competing, this book contains all you need to know about bodybuilding, which will give you the correct solid foundation to help you push upwards, and onwards, to a greater level of bodybuilding. Written in an easy to understand format, without any 'BS', it lays down the laws and rules. You now have the opportunity to seize all that knowledge, saving yourself years of disappointment.
